

# PROVINCIAL HOME OXYGEN INC.

## Governance

**Subject: Who Are We?**

**# 1.0**

**Approved: November 2000**

**Page: 1 of 1**

**Revised: September 2007**

Our Company was founded on the premise that there was a growing need in the community to create a work environment that would provide exceptional service, which would in turn foster the respect and be valued by every person touched by our organization.

Provincial Home Oxygen Inc. is an independent Canadian Respiratory Homecare Company founded in January 2000. We are dedicated to providing the *'highest standards of respiratory care'* for each of our clients in the comfort of their own home.

As an authorized vendor of S.A.I.L. (Saskatchewan Aids to Independent Living) and more recently of AADL (Alberta Aids to Daily Living), Provincial Home Oxygen Inc. is owned and operated by Registered Respiratory Therapists and Registered Nurses.

Provincial Home Oxygen Inc. believes that our professional team of dedicated employees brings not only their compassion and commitment to the community but also a wide range of quality products and services. We are dedicated to continuing to raise the standard of care in our communities.

We provide oxygen therapy with state-of-the-art equipment, regular clinical assessment with physician follow-up, direct in-home cylinder delivery and patient and/or community education. Also, we support C-PAP therapy instruction and set up, as well as asthma instruction and supplies, while providing 24 hour emergency service.

As proactive leaders in the marketplace, our clients are our most valuable asset.
